

# Examples of iMovie Effects/Tools

Used to add interest to your video.

## Inspector Tools:

### Clip-

- Video effects (B&W, Aged, X-Ray, etc)
- Speed (Increase/Decrease)
- Direction (Forward/Reverse)
- Length of clip

### Video-

- Adjust color (Do not show you this)

### Audio-

- Volume (+/- volume from 0-200%)
- Ducking (Reduces background sound outside the video)

## Music/Sound Effects:

- Add music/sound effects to your video from iTunes, iMovie, Garageband, etc.

## Photos:

- Add pictures to your video from iPhoto and Photo booth.

## Titles:

- Add titles on top of your video or create a background to place them on.

## Transitions:

- Add transitions between scenes of your video. (Eliminates jump cuts)

## Voice-over:

- Allows you to directly import a voice-over into your video
